AMG-8 Action Items

1. (OMTWG, Lutz) Revise HLA Process Chart to define relationships among activities. Evaluate use of standard process notation. Lutz will provide results to TST core for coordination across the program. Revised version to be presented to the AMG.

2. (DMSO, Ponikvar) Add capability to Process Chart on web page for automated collection of comments on the chart and supporting text.

3. (TST Core) Revise HLA definition and rules to incorporate the concept of the RTI as a component of the HLA.

4. (AMG members)   Provide input to TST Core on "reasonable" boundaries for HLA rules 7 and 8.

5. (DMSO) Present discussion at next AMG meeting on what is expected to happen after August 1996 baseline definition is released.

6. (DMSO) Provide update at next AMG on development of Protocol Catalog/ DIS Data Dictionary for use to support HLA.

7. (AMG members) Provide copy to TST Core of any HLA briefings being used (to support development of the general HLA management briefing action carried over from AMG-7).

8. (Protofederation leads) Provide feedback on Time Management and Data Distribution ("filtering") proposals at 8 January 96 meeting at DMSO.
